COMING WITH HANGING CHAINS

SIMPLE AND ELEGANT

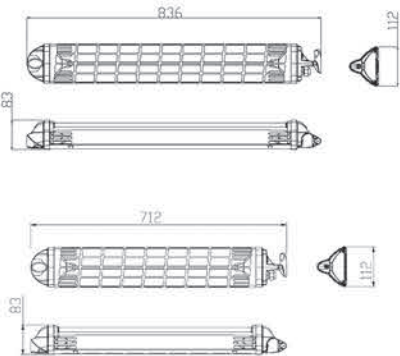

The traditional Fiore's design is now even more elegant, more practical and adaptable to every environment thanks to the ELEGANT pole and the anti-tilting free standing base.

EFFICIENT, FAST AND CLEAN HEATING

Fiore is an IR-A heater. As the complete MO-EL short wave heaters range (Petalò, Sharklite, Lucciola and Hathor), it is characterized by high efficiency and immediate warmth. Our IR-A products start warming up as soon as you turn them on. They absorb electricity and convert it in heat. The efficiency is granted by avoiding glass barriers which would decrease the power of the heating rays. The aluminum reflecting element focuses the luminous emission forward, so that the heat can be concentrated where needed, while the rear surface remains cold.

Made in aluminum and nylon (+ glass fiber) Fiore doesn't rust. Rated IP65, it is protected against dust and water and can be installed both indoor and outdoor. Air flow, wind or humidity do not affect its efficiency. The working costs are cheap if compared with other sources of heat such as propane gas. Fiore is the perfect solution both for small and large surroundings that require an immediate, silent and safe heating.

MADE IN ITALY

**NEW: FIORE WITH
HEAVY DUTY CABLE
766NC - 767NC**

REF. 768PN
